

agency & operator front/back office solution

We are proud of our reputation as one of the longest established providers of systems and it is therefore no surprise that TARSC is one of the UK's leading agency management systems with thousands of desktops in the UK connecting everyday.

agency & operator front/back office solution

Regardless of the size or type of your business TARSC can provide you with all the management, administration and accounting functionality that you need. Easy to use, flexible to your needs, constantly evolving to give you the most reliable and up to date management system available, TARSC is the product you have been looking for to help drive your business forward.

So what is TARSC?

TARSC provides you with all the management, administration and accounting functionality that is required to run a successful business. At the touch of a button TARSC offers you extensive reporting functionality including VAT, marketing, turnover, cash flow, commission, nominal and expense reports providing you with all the tools you require to plan and manage your business.

To assist you in maximizing user productivity TARSC also has the functionality of hand off integration with CRS systems, Viewdata and XML feeds.

Technical Information

Your TARSC system will be centrally hosted at our Head Office in Essex using the very latest IP software.

This technology negates the need to operate and manage your own server. Back ups are completed on a daily basis and stored in a separate disaster recovery location, checks are completed 364 days of the year to ensure your TARSC server is up and running.

Server maintenance and updates are completed out of hours and new upgrades to TARSC are automatically released. For extra resilience the Vertical Group have installed external emergency generators. Multiple branches will benefit immensely from this platform. All branches access the one server, eliminating the need to poll and merge each branches data making the management of your branches easier, quicker and more efficient.
